Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Overview

- Brief Introduction
 - Computer Access Intervention Process
 - Clear Evidence, Better Solutions
- Use of Evidence in Computer Access
 - Pointing Devices
 - Text Entry
 - Switch Use

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Access Intervention Process

- Goal: to find the best computer access solution for an individual's needs
- Determine client needs and goals
- Assess characteristics of client, environment, tasks
- Compare possible solutions for input & output
- Recommend & implement particular solution
- Configure for user's needs
- Measure outcomes

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Clear Evidence, Better Solutions

- Make decisions based on clear evidence related to the client
 - External or field evidence
 - Knowledge & skills of the providers
 - Individual evidence
 - Discussion with client
 - Functional skills assessment
 - Trials with potential interventions

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Clear Evidence – example uses

- Setting goals: therapy, IEP, etc.
 - Identifying needs
 - Justifying areas of work
- Funding support
- Choosing methods and techniques
- Tracking progress
- Measuring outcomes

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Types of Evidence

- Observation
- User Feedback
- **Measurement**

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Measurement Focus

- Assess user abilities that are most relevant to computer usage
- Speed and accuracy during performance of specific fundamental tasks
 - Text entry
 - Target selection
 - Target dragging
 - Switch press

Computer-based Measurement Tools

- Present tasks that are repeatable, relevant, and realistic
- Efficient data collection and report generation
- Ideally – get the information you need, in less time!
- Focus on KPR software, but will mention other options

Pointing Device Use

- Select best pointing method
 - Mice, trackballs, trackpads, head-controlled mice, keyboard-based approaches, etc.
- Configure for user's needs
 - Location, splinting, device behavior, etc.
- Follow-along
- Very little external evidence available

Skills & Measures for Pointing

- Target Acquisition
 - Dwell, click, double-click
- Dragging
- Menu Selection
- Speed & accuracy
- Complements observations & feedback

Gathering Pointing Device Evidence

- Available, but not recommended:
 - Custom Solutions website
 - Reach assessment tests
- Better, research-based options (IMHO):
 - Compass software
 - Pointing Wizard

Compass Software

- Aim, Drag, and Menu tests specifically for pointing device skills
- Assess on-screen keyboard use with text entry tests
- Setup is highly customizable, if desired
- Validity has been demonstrated
- Compatible with alternative inputs and outputs
- Reports and data are stored for easy review and retrieval

KPR Koester Performance Research

Compass Example

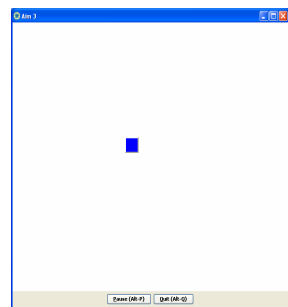

- Selecting the best pointing device for an individual with upper extremity impairments
- Young adult with CP performed Compass Aim tests with three different pointing devices
- Test set-up was identical for each device

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Compass Aim Test

- Measures speed and accuracy of user's target selections
- Reports averages across targets, as well as target-by-target data

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Compass Example: Results

	Trial Time (sec)	Entries
Mouse	2.6	1.4
Trackpad	4.9	1.3
Trackball	5.4	1.3

- View PDF Report...
- Control looked similar, qualitatively
- But performance was much faster with the mouse
- Provides team (including user) with means of making an informed decision

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Pointing Wizard Example

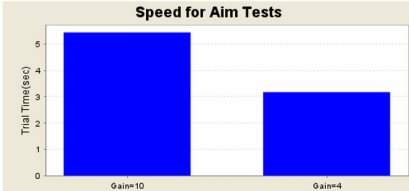

- Adjusting Windows settings to meet user's needs
- Pointer speed: gain of the pointing device
- Double-click settings:
 - Double-click time
 - Double-click distance
- Object sizes: menus, caption buttons, scrollbar, taskbar

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Pointing Wizard Example

- 52 year-old man with cerebral palsy
- Slower pointer speed yielded:
 - 42% increase in speed relative to default
 - 41% decrease in entries relative to default

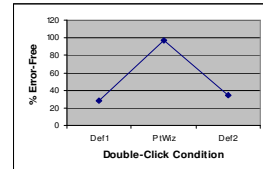

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Pointing Wizard Example #2

- 57 year-old man with history of stroke
- With wizard-recommended settings:
 - 97% error-free performance
 - Major improvement relative to default settings
 - Double-click distance was the most important change

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

Pointing Summary

- Clear evidence, Better solutions
- Compass: for assessment, more formal evidence-gathering
- Pointing Wizard: tool for end user to leverage Windows settings effectively

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

Text Entry

- Using keyboard or alternatives such as on-screen keyboard, speech recognitions, scanning
- Some external evidence exists
- Gather internal evidence about the user:
 - Choose the best text entry method
 - Configure the text entry method
 - Track progress

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

Skills & Measures for Text Entry

- Reliable and efficient access to all characters and functions
- Words (or characters) per minute
 - overall and with errors removed
- Errors
- Complements observations and feedback

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

External Evidence for Typing

Input Method	Text Entry Performance (wpm)		
	Slow	Average	Fast
UE Typing, touch	20	30	60
Speech Recognition	< 10	16	30
UE Typing, C5-6	4	16	25
Mouthstick Typing	< 5	10 – 12	20
Morse Code	< 5	8	12
On-Screen Keyboard	< 5	6 – 8	10
Row-Col Letter Scanning	< 1	4	8
UE Typing, MS	2	?	7
Tongue-touch Keypad	< 1	2	5

How would you use this sort of information?

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

Gathering Text Entry Evidence

- List of tools:
 - “Standard” typing tests
 - TextTest and StreamAnalyzer
 - Compass software
 - Keyboard Wizard

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Koester Performance Research

Free Typing Tests

- TypingTest.com
- speedtest.10-fast-fingers.com
- Typical limitations:
 - Distracting screen
 - One size fits all
 - Can’t save results
 - Psychometric validity unknown

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Example of distractions, in TypingTest.com

The screenshot shows the TypingTest.com interface with several distractions. On the left, there's a large ad for 'Get 8 FREE issues of People'. In the center, there's a text passage about baseball. On the right, there's a 'NEW VOSTRO™ 3500' laptop advertisement. At the bottom, there's a 'Accelerate Your Typing' banner for TypingMaster Pro. The interface also shows a 'TIME LEFT' timer and a 'TYPING SPEED' indicator.

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Mavis Beacon Teaches Typing

- About \$20
- Intended as a tutor but includes speed tests
- “Detailed” tracking and progress reports
- Games and music
- English, French, and Spanish

broderbund.com/c-33-mavis-beacon.aspx

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

TextTest and Stream Analyzer

- faculty.washington.edu/wobbrock/ - J. Wobbrock
- Free, HCI research tool
- Practice and test modes
- Two included phrase sets or create a custom set

The screenshot shows the TextTest software interface. It displays a text entry task: 'everyone wants to win the lottery'. Below the text, there's a 'Next' button. At the bottom, there's a file name '89142528.xml' and a 'Practice' button. The interface also shows a progress indicator '1 of 2'.

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

StreamAnalyzer

Num	Testing?	Time	WPM	AdjWPM	CPS	KSPS	GPS	Intra	Inter	StrDist	M
1	0	34.188	11.583	11.293	0.965	1.258	1.293	0.6309546	0.1598864		
2	1	21.532	14.49	13.997	1.208	1.393	1.489	0.531258	0.1834839		

- Trial number
- Test or practice
- Total time for trial
- WPM
- WPM adjusted with errors
- Characters per second
- Keystrokes per second
- Gestures per character
- Average time per character
- Average time between characters
- Plus 24 more

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPR Koester Performance Research

Compass Software

- Letter, word, and sentence tests specifically for text entry skills
- Setup is highly customizable, if desired
- Validity has been demonstrated
- Compatible with alternative inputs and outputs
- Reports and data are stored for easy review and retrieval

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

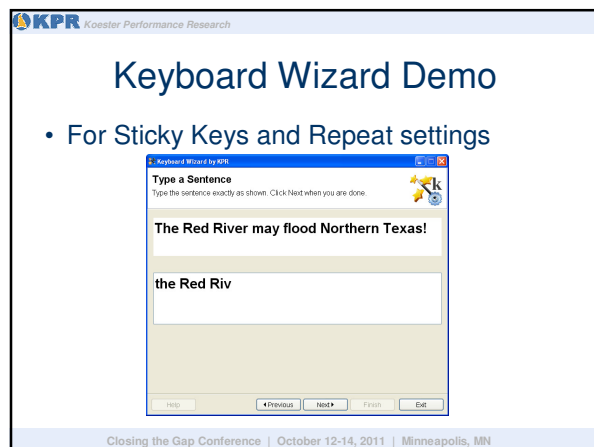

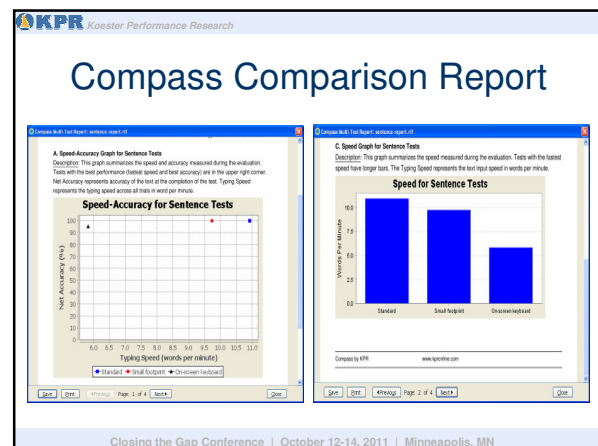

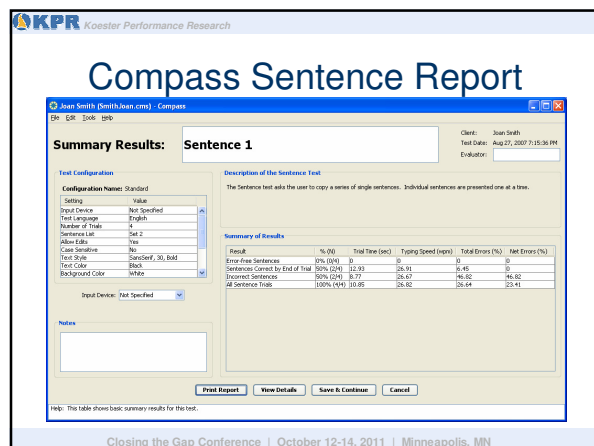

KPR Koester Performance Research

Compass Sentence Test

- Compatible with alternative text entry methods
- Adjustable font, size, text difficulty, feedback, etc.
- Accurate and valid measurements

The screenshot shows the Compass Sentence Test software interface. It displays a sentence entry task: 'We dine out on the weekends.' Below the sentence, there's a text entry area. At the bottom, there's a 'Pause Test' button and a 'Quit Test' button.

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Text Entry Example

- 68 y/o woman with multiple sclerosis
- Runs through Keyboard Wizard (demo)
- Adjusting auto-repeat setting:
 - Improved typing speed 50% (from 2.2 to 3.2 wpm)
 - Reduced errors 32 pp (from 60% errors to 28%)

Text Entry Summary

- Clear evidence, Better solutions
- Use external evidence for perspective
- Free typing tests OK with caveats
- Compass: for assessment, more formal evidence-gathering
- Keyboard Wizard: tool for end user to leverage Windows settings effectively

Switch Use

- Select best switch
 - Location
 - Activation method
- Configure scanning software
 - Scan rate
- Compass or SSPT for gathering evidence

KPRKoester Performance Research

Skills & Measures for Switch Use

- Reliable and efficient switch press
- Press time
- Release time
- Errors (extra switch hits)
- Complements observations and feedback

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPRKoester Performance Research

Single Switch Performance Test

- Free from www.aac institute.org
- Three Tests
 - Activation
 - Release
 - Repetition

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPRKoester Performance Research

Single Switch Performance Test

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPRKoester Performance Research

Compass Switch Press Test

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPRKoester Performance Research

Finding the best switch site

- High school student with cerebral palsy
- No reliable use of a single switch to access a computer or other devices
- Use Compass to compare several switch sites

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

KPRKoester Performance Research

Compass Switch Press Results

	Correct Trials	Avg. Trial Time (s)	Avg. Press Time (s)	Avg. Release Time (s)
Head Right	5/5	8.5	7.8	0.64
Head Left	5/5	9.0	8.5	0.57
Head Posterior	4/5	17.4	11.1	6.32
Right Hand	2/5	19.4	15.6	3.8
Right Finger	4/5	11.2	8.6	2.5

How would you use this information?

Closing the Gap Conference | October 12-14, 2011 | Minneapolis, MN

Choosing an appropriate scan rate

- Simple estimate:
 - Appropriate scan rate = $\text{pressTime} * 1.5$
- Establishes a scan rate that is generally neither too fast nor too low, for an experienced scanner
- Example: $\text{pressTime} = 2.5$ seconds
 - Scan rate = $2.5 * 1.5 = 3.8$ sec

Switch Use Summary

- Clear evidence, Better solutions
- Measure switch press time for:
 - Finding best switch site
 - Establishing an appropriate scan rate

Conclusions

- Gathering clear evidence can enhance decision-making and document success of an intervention
- Clients themselves often really appreciate seeing data about their performance
- Give one of these tools a try, if you haven't already

KPR Software Details

- Resources at KPR website, kpronline.com
 - Compass, Win/Mac, \$179
 - Wizards, Win, \$16.95 each
 - Compass + Wizards bundle, \$195
 - Free trial of Compass available
 - Demonstration videos
- Compass also available through Infogrip, EnableMart, and Technology for Education

Final Words

- KPR research & development is supported by:
 - National Institutes of Health
 - Paralyzed Veterans of America Research Foundation
- Thanks for being here today!
